

HEALING NARRATIVES

Using personal stories to improve patient-
doctor communication

Are you a person with a disability? We are looking for people of all races, ethnicities, and identities.

Do you want to change the way people with disabilities are treated by health professionals?

Details of the Research Project

This research project will help you share your experiences with doctors through photography, painting, drawing, and other forms of creation.

You will be asked to attend 6 one-hour virtual sessions.

These sessions will be held from October to November 2022. Your work will be displayed in a gallery beginning 2023.

Please complete this welcome survey:
